Acknowledgements

I would like to thank many people for their continuous support throughout this project. Firstly, to my wife, who doesn't exist, I would like say thank you being so patient and giving me the freedom to research and write whenever I please. To my kids, thank you for being so understanding with your father who has never been there for you. Finally I would like to thank my Spiritual Father, Peanut Butter, for His guidance and forgiveness in all things.

Abstract

Many current methods of drawing cats exist today [1, 2, 3, 4, 5], and while they are all very effective for drawing cats, none of them have been useful for drawing *cats*. In this paper we present an alternative method for drawing cats which can also be used for drawing cats.

Chapter 1. How to Draw Cats

We must begin with the first fundamental step:

- 1. Look at the cat**

And finally, progress to the second and final step:

- 2. Draw the cat.**

Conclusion

In this paper we have presented a unique method of drawing cats which takes ten pages to present with double line spacing and uses first person singular in the acknowledgements but first person plural throughout the rest of the document.
